### **Jackson Safety Introduces New Safety Hat – The Blockhead**

(St. Louis, MO, March 1, 2007) Jackson Safety, a manufacturer of welding and personal protective equipment, is excited to announce the newest addition to our safety headwear line, the Blockhead full brim safety hat – a “*chip off the old blockhead.*”

This new safety hat combines the best of the Cyco and SH3 into one unique design! Now, with the Blockhead, you can have safety and protection from the sun in a contoured, smooth dome design at a price point ideal for both the industrial and safety markets. The Blockhead features a unique smooth dome design with a full brim that provides protection from UV rays and debris falling on ears and back of neck. Increased thickness on the front and back brim provide durability for an added sense of protection and an added anti-glare finish under brim prevents eyestrain.

This safety hat is offered in a variety of colors featuring a 8 point ratchet suspension. The Blockhead meets ANSI Z89.1 standards for Type 1 Class C, G and E.
