Jackson Safety Introduces a New Hearing Protector – The Jammer

(St. Louis, MO, May 1, 2007) Jackson Safety, a manufacturer of welding and personal protective equipment, is excited to announce that now you can rock while you work with the Jammer – AM/FM stereo radio and Hearing Protector.

The built-in AM/FM stereo radio will increase productivity and ensure worker compliance by listening to your favorite music, news, weather, sports and talk radio programs while maintaining protection from harmful noise. A moisture proof compartment for electronic assembly makes it ideal for use in plants, forestry and yard work. The Jammer features an ergonomic design with a single button for on/off and volume, one AM/FM switch and one for channel selection – it's so simple that it can even be operated with gloves on.

The Jammer runs on 2 'AA' batteries that supply over 300 hours of battery life. It has a protection rating of NRR 25 that is ideal for medium noise environments.
