Jackson Safety Introduces New D-Cell L.E.D. Barricade Light – The Sundowner

ST. LOUIS, MO (February 21, 2008) – Jackson Safety is excited to remind you that when the sun goes down, we go to work at providing guaranteed visibility on the roadways! Our new and improved L.E.D. barricade light, the Sundowner operates on 4, easy to install, D-Cell batteries that make it significantly more user-friendly and lightweight than the original, heavier 6V version. An internal ambient photocell operates with a timed delay that reacts to natural light in the environment. A 90 degree angle lens offers increased visibility to oncoming traffic and 3 way switching options – steady burn, flashing, off – make it easier than ever to use for any application! The Sundowner meets all MUTCD and ITE requirements and is MADE IN THE U.S.A.

About Jackson Safety

Jackson Safety, headquartered in Fenton Missouri, is a global market leader in the manufacturing of welding, industrial and traffic safety products.

Jackson markets its products worldwide, with emphasis on North America, Canada, and Europe, under established, well-known brand names such as Jackson, Allsafe, Services & Materials, Smith & Wesson, Winchester, Hunstman and Silencio.
